Subject: [External] Kiawah Island Utility PSC docket No. 2021-324-WS

Dear PSC board,

We are owners of an older home on Kiawah Island. The proposed rate increase is due to the large number of new homes being built on Kiawah Island. The increased costs of the utility are due to the increase in utility demand caused by building new homes. These increased costs should be paid by those building new homes, and Not by those who have already paid for the exist infrastructure. This current proposal will have existing home owners subsidizing the increased costs created by new homes. It is appropriate that new home owners pay for the increased infrastructure costs they have created. This rate increase should be completely revised.

Thank You,

Douglas & Laura Brant
